**VICTORIA (VICKY) BURKS**

Occupation: Secretary with the IRS

Current Residence: Boise, Idaho

Employment: June 1978- November 1980 Secretary for Physicians Mutual Insurance Company.

March 1981 - October 1984 ( Fire Seasons)

Secretary & Dispatcher for Boise Interagency Fire Center (BLM).

Sept. 1982 - Sec. 1984 Stagehand, Spotlight Operator and Local Crew Member for BSU Pavilion.

Oct. 1984 - Nov. 1987 Secretary for Mobilization & Training Equipment Site-Idaho Army National Guard.

Nov. 1987- Present Secretary for Examination Section- IRS.

School: January 1982 - May 1984 Theatre Arts Major- BSU.

Hobbies: June 1978 - May 1981 Fashion Model at John Robert Powers.

May 1985- Present - Crew member for Boise Valley Balloons - Hot Air Ballooning.

Starting in June 1978, I worked as secretary for Physicians Mutual Ins. Co., until late Nov. 1980, when I declined the offer to transfer with the Boise office to Billings, Montana.

In March 1981, I became employed as the Logistics Support Office dispatch secretary on the swing shift, with the Bureau of Land Management/Boise Interagency Fire Center (BIFC). Through October 1984, I worked each summer during Fire season.

Because BIFC was seasonal, I occupied my time between fire seasons, starting with Spring Semester 1982, by returning to school at BSU. My major was Theatre Arts, specializing in the technical aspects of theatre productions. I remained at BSU through Spring semester 1984.

During Fall Semester 1982, I became employed as a local crew member (stagehand, spotlight operator & truck loader) for concerts and events held at the BSU Pavilion. I worked two years at the Pavilion (thru Dec. 1984); and during that two years, I met many unique and interesting people. Of All the jobs I've worked, this was probably the one I'd consider as the most fun.

In late October 1984, I went to work as secretary for MATES. No, not a dating service; well, not officially anyway. MATES is the abbreviation for Mobilization and Training Equipment Site of the Idaho Army National Guard. Many tasks, carriers, heavy equipment and vehicles are stored and maintained there for training National Guard Troops during maneuvers. I was employed at MATES until late November 1987.

In November 1987, I became employed with the U.S. Treasury Department, Internal Revenue Service, My duties are that of secretary, and I'm currently training for tax examiner- Talk about Job Security! Hobbies: During the summer of 1978, I became a Fashion Model at John Robert Powers. Modeling was fun but very time consuming, and I soon found conflicts between my hobby and work. So, the hobby had to go. For awhile, because of my school and work schedules, I didn't have much time for hobbies, However...

Since May 1985, I've been a crew member for Boise Valley Balloons, and I'm considered an unofficial student pilot. The hot air balloon that I crew for is named Gypsy Jubilee, and is owned by pilot Kemp Lindsey and his wife Georgia, who is our Crew Chief and also is a pilot. Hot air ballooning gets in your blood. On most weekends, weather permitting. pilots, and crews are up before the sun in preparation for a sunrise launch. Riding in a balloon is best described as floating. The people in the

ballooning circuit are a close knit group-plenty of hugs for everyone! Of everything I've done since graduation from Boise High, hot air ballooning is the most fulfilling for me. To top it off. I've been asked to serve as Assistant Crew Coordinator for the 1988 Boise Hot Air Balloon Rally, which opens the Western Idaho Fair.

After I graduated from Boise High I studied in Oregon for 2 years. The summer between I fought fires and found out the hard way that I'm by no means, a reinhart welding, muscle bound he-man... it was Hell! Then I lived with families in France, Germany and England as an exchange student for a year of whirlwind experiences & language changing.

I came home to Boise, kissed the runway & spent a half year in bed. Once rested. I bought a 56' Volks bug (which I still own) & promptly blew up the engine! The embarrassing realization that oil was more important than gas began my love affair with working on that bug. Rebuilt and ready to roll, I went to University of Oregon where I lived in a communal living group of hippies still hanging on to Dylan and Hendrix. That encounter scared me as far South as I could go - San Diego. And I've been here ever since, studying, waitressing, and working as a graphic designer.
